

Get order by ID

Retrieve specific order details by ID. The user context is resolved based on the provided API key.

Note

Rate limit: 1000 requests per minute.

Request

Path parameters

[Collapse](#) —

venue_order_id string(uuid) **required** ^

Unique identifier (UUID) of the venue order.

Header parameters

[Collapse](#) —

X-Revx-Timestamp integer **required** ^

Example:

Current timestamp in Unix epoch milliseconds. Used to prevent replay attacks and construct the signature. Provided with other [authentication headers](#).

X-Revx-Signature string **required** ^

Example:

The Ed25519 signature of the request. Provided with other [authentication headers](#).

Tip

See [Authentication headers: Signing a request](#) for details on how to generate this.

Response

200 400 401 403 404 409 5XX

OK - Order details.
